Bryant Ricardo Serrano Sánchez

Software Engineer

Mexico · bryantser96@gmail.com · github.com/bryantserrano · LinkedIn

Summary

Software Engineer with a networking background and 6+ years in tech, including 2+ years building backend services, AI applications, and user interfaces. Experienced with Python, FastAPI, Node.js, React, OpenAI, cloud services, the software development lifecycle, and communication with people.

Experience

Cisco March 2026 – Present

Software Engineer

- Develop internal integration dashboards with React and TypeScript, using TanStack Query, React Router, and Okta OIDC authentication.
- Build Node.js and Express.js services integrating MuleSoft, Splunk, and internal metadata APIs, with PostgreSQL and OpenSearch for ETL monitoring, event tracking, and platform health reporting.
- Create Splunk searches, dashboards, and alerts to monitor integration traffic, identify failures, and investigate transaction activity.
- Develop a Webex-based AI assistant using Deep Agents for internal workflows.

Cisco January 2024 – March 2026

Escalation Engineer, Cisco TAC

- Developed internal applications and Webex bots for campaigns, events, and Customer Experience Center initiatives.
- Automated recurring workflows to reduce manual effort and support team productivity; managed critical technical escalations and delivered technology training.

Cisco October 2020 – December 2023

Technical Consulting Engineer, Cisco TAC

- Troubleshot Enterprise routers (IOS-XE), debugged software using core files, and supported virtual router deployments across NFVIS, VMware, AWS, Azure, and GCP.
- Worked with RESTCONF, NETCONF, telemetry, and Smart Licensing technologies.

Netcontroll February 2020 – October 2020

Help Desk

- Provided technical assistance, network traffic analysis, and customer support for Palo Alto Networks NGFW products.
- Coordinated complex issues with Palo Alto TAC and wrote Python scripts to automate reporting alerts.

Bank of Mexico June 2019 – December 2019

Intern, Information Security Office of Applications

- Contributed to application security by implementing a DLP system and wrote Python automation to improve operational efficiency.

Skills

AI & Automation: OpenAI API, AI Agents, MCP, Agent Skills, Make, n8n
Backend: Python, FastAPI, Node.js, Express.js, JavaScript, Java, C, REST APIs, JWT, OAuth 2.0, LDAP
Frontend: React, TypeScript, SvelteKit, Skeleton UI, HTML5, CSS3
Data: PostgreSQL, MongoDB, OpenSearch
Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Ansible, CI/CD, Git, GitHub, Splunk
Testing & Networking: pytest, Postman, Bruno, Cisco IOS XE, enterprise routing, NETCONF, RESTCONF, network telemetry

Education & Certifications

National Autonomous University of Mexico (UNAM) — Computer Engineering, GPA 9.11/10 August 2015 – June 2020

AWS Certified Cloud Practitioner (Amazon), July 2023 – January 2029 · Salesforce Certified Platform Foundations, August 2026
